

1. Go to Settings and then to Network & Internet

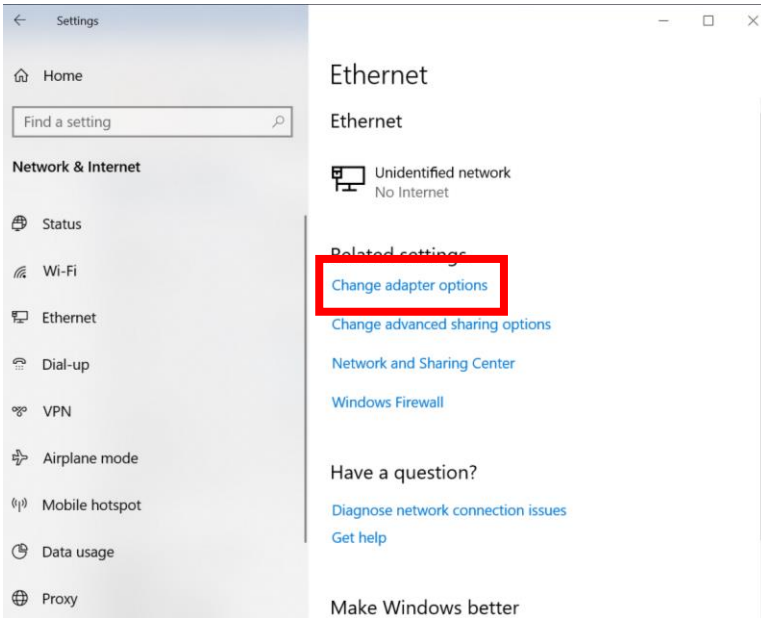

Windows Settings

2. Go to Ethernet

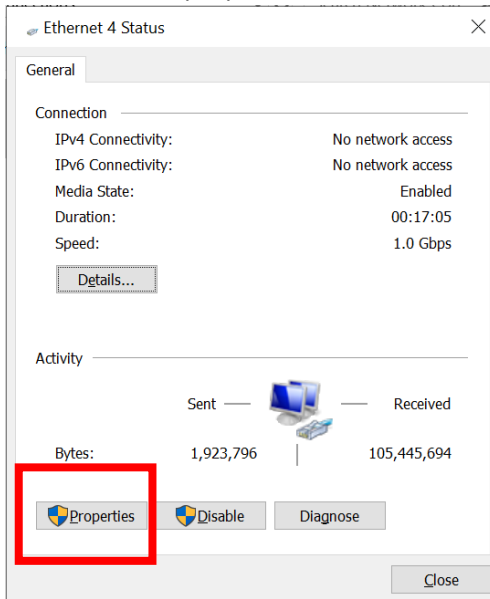

3. Go to Change Adapter Options

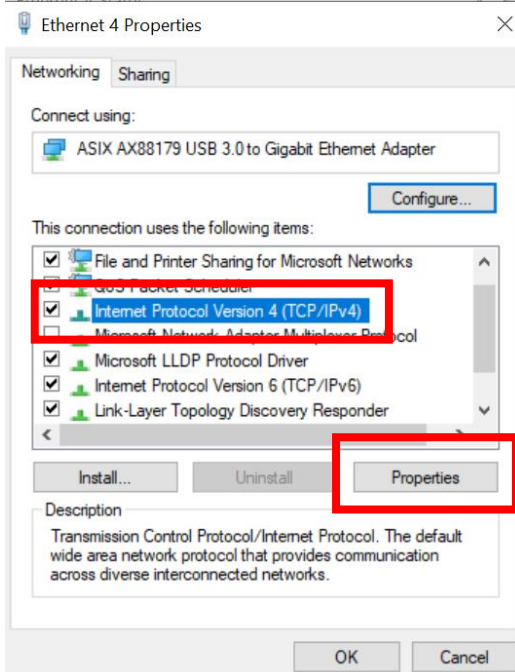

4. Select the Ethernet Device you are connecting to

5. There, click on properties

6. Select "Internet Protocol Version 4 (TCP/IPv4)" and select Properties

7. Insert the IP address, subnet mask, and Default Gateway listed below.

Internet Protocol Version 4 (TCP/IPv4) Properties

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

Obtain an IP address automatically

Use the following IP address:

IP address: 10 . 0 . 0 . 2

Subnet mask: 255 . 255 . 255 . 0

Default gateway: 10 . 0 . 0 . 1

Obtain DNS server address automatically

Use the following DNS server addresses:

Preferred DNS server: . . .

Alternate DNS server: . . .

Validate settings upon exit

Advanced...

OK Cancel

Done!
